Solid base, safe drainage and classy outdoor facilities

Modern outdoor surfaces

To create a stable and walkable surface, we produced drag slabs. This was followed by frost cover fills in the entire outdoor area to ensure ground stability. A harmonious overall look was created for the parking areas using surface paving and asphalt, while the main entrance is highlighted by coloured asphalt. Concrete kerbstones define the areas, and decorative gravel tastefully rounds off the overall picture.

Impressions

Image notes

1

A highlight inside and out.

The two Interpark twin buildings with brand new outdoor space.

2

Harmonious combination.

The main entrance is framed by tastefully paved paths and a lively row of trees.
